How to use this template

This template provides two things:

1. **A set of layouts** - these provide consistent layout and style both within and between Foundation presentations, and should not be modified within your own presentation (if you really need a custom layout, use “Blank” then add whatever custom elements you require to it)
2. **A set of regularly used FINOS slides** - these provide common information and graphics and can be deleted as needed in your own presentation.

If there’s a problem with a layout, or you find yourself regularly needing a new one, let our marketing team know and we can add it to the template so that everyone benefits.

What is FINOS?

FINOS
Fintech
Open Source
Foundation

The Fintech Open Source Foundation (FINOS) is an **independent, non-profit membership organization** whose purpose is to **accelerate** collaboration and **innovation in financial services** through the adoption of Open Source software, standards and best practices.

FINOS is also the financial services project of the Linux Foundation, the largest shared technology investment in the world.

Oh, and in case you're wondering, it's pronounced ***fee·nowz***

THE LINUX FOUNDATION

What do we do, at a glance?

The Fintech Open Source Foundation (FINOS) acts as an **independent, neutral, compliant steward** for transparently governed open source, open standards and specifications **relied & collaborated upon by the financial industry at large.**

Supported by over **80 member organizations**, we nurtured **2000+ contributors from financial institutions, big tech and fintech vendors** to mutualize resolution of **common, non-differentiating strategic challenges** in **50+ open projects**.

Open Source
READINESS

FINOS also runs an **Open Source Readiness Initiative** to help financial firms harvest **the full business value of open source participation, in full regulatory compliance**

.

OPEN SOURCE
IN
FINANCE FORUM

FINOS hosts the **Open Source in Finance Forum**, the only **Open Source conference solely focused on financial services and regulated industries**.

FINOS Project Sandbox

Benefits

For adopters: it shows the art of the possible of FINOS projects.

For project maintainers and contributors: it lowers barriers to participation and helps projects scale, providing a venue for consumers and contributors to engage.

WALTZ

What is the FINOS Project Sandbox?

The **FINOS Sandbox** allows FINOS open source projects to host a public runtime environment to serve different purposes, like enabling easy evaluation, public collaboration or delivering real life demo environments. The FINOS technology team provides infrastructure and operational support to project maintainers, enabling them to focus on development rather than operations.

Propose a Project for Inclusion

All contributors to **FINOS projects** that are affiliated with a **FINOS Member** can request to be included in the FINOS Project Sandbox by emailing help@finos.org.

2025 FINOS Strategic Initiatives

Each year the FINOS Governing Board and its Members identify strategic priorities across our 60+ projects: the FINOS Strategic initiatives receive focused attention from the FINOS team and dedicated funding.

AI READINESS

The newly formed **AI Readiness SIG** will provide a space to address challenges that are common to all members to develop a governance framework that manages the on-boarding, development of, and running AI-based solutions within FS organisations.

AI Readiness Github

FINOS COMMON CLOUD CONTROLS

The **FINOS Common Cloud Controls (FINOS CCC)** is a pioneering initiative aimed at standardizing cloud deployments within the financial services sector.

CCC Homepage

2025 FINOS Strategic Initiatives

Each year the FINOS Governing Board and its Members identify strategic priorities across our 60+ projects: the FINOS Strategic initiatives receive focused attention from the FINOS team and dedicated funding.

CDM
COMMON DOMAIN MODEL

The **Common Domain Model (CDM)** is a standardized, machine-readable, and machine-executable model representing financial products, trades, and their lifecycle events.

CDM.finos.org

FDC3

FDC3 is a standardized framework developed for interoperability between financial applications. It aims to simplify communication and integration across different financial software.

FDC3 Homepage

2025 FINOS Strategic Initiatives

Each year the FINOS Governing Board and its Members identify strategic priorities across our 60+ projects: the FINOS Strategic initiatives receive focused attention from the FINOS team and dedicated funding.

Open RegTech

The **Open RegTech Initiative** is raising awareness on a novel approach to regulatory technology based on open source and standards, and hosting projects.

Open RegTech Homepage

OS-C

OS-C fosters an open collaboration community to build a data & software precompetitive platform to dramatically boost global capital flows into climate change mitigation & resilience.

finos.org/os-climate

Call to action: Get involved!

Anyone can consume, participate and contribute to FINOS projects, join or host our events and join our public mailing lists.

FINOS Special Interest Groups

SCAN ME

FINOS **Special Interest Groups** provide a **venue** to discuss **common challenges in financial services** and to agree on actionable **use cases**. FINOS SIGs contribute new use cases to existing projects, or lead to the proposal of new open source projects to the Foundation.

AI READINESS

The newly formed **AI Readiness SIG** will provide a space to discuss challenges that are common to all members. Get involved in the formation today.

DIVERSITY EQUITY + INCLUSION

Special Interest Group

The **FINOS DEI SIG**, is a collaborative initiative that aims to unite contributors committed to fostering diversity and inclusivity within the industry.

Open Source READINESS

The **Open Source Readiness (OSR) SIG** is a targeted program developed by FINOS to help financial services firms advance their open source programs.

ZENITH

Zenith is a SIG that is an industry-wide collaborative effort, hosted at FINOS, aiming to understand, define and build standards that enable adoption of emerging technologies.

Special Interest Groups meet regularly and participation is open to everyone. Find the next meeting on the *FINOS Calendar*
*(email **help@finos.org** if you would like to be added to a recurring calendar invite)*

FINOS Special Interest Groups

SCAN ME

FINOS **Special Interest Groups** provide a **venue** to discuss **common challenges in financial services** and to agree on actionable **use cases**. FINOS SIGs contribute new use cases to existing projects, or lead to the proposal of new open source projects to the Foundation.

Tech Enablement

InnerSource SPECIAL INTEREST GROUP

A community of people implementing and accelerating InnerSource- i.e. applying open source best practices to proprietary code development - within their financial services organization. It is led by FINOS members **Capital One, Deutsche Bank, InnerSource Commons, Morgan Stanley, and RBC.**
Learn more at github.com/finos/InnerSource

DevOps Mutualization

Aims to solve common engineering problems in the highly regulated financial services industry. It is led by FINOS members **Morgan Stanley and Cloudbees**..
Learn more at github.com/finos/devops-mutualization

Business Use Cases

FINANCIAL OBJECTS

A community of people interested in creating **open source solutions for regulatory and compliance issues in financial services.** It is part of the FINOS Open RegTech Initiative and is led by FINOS Member **AIR and by ING.**

Learn more at github.com/finos/open-regtech-sig

Regulation Innovation SPECIAL INTEREST GROUP

A neutral forum for individuals across the financial services industry to collectively identify the need for **new, open, financial objects standards as well as modifications to existing ones.**.It is led by FINOS members **Goldman Sachs and ISDA**,
