

How to use this template

This template provides two things:

- 1. A set of layouts** - these provide consistent layout and style both within and between Foundation presentations, and should not be modified within your own presentation (if you really need a custom layout, use “Blank” then add whatever custom elements you require to it)
- 2. A set of regularly used FINOS slides** - these provide common information and graphics and can be deleted as needed in your own presentation.

If there's a problem with a layout, or you find yourself regularly needing a new one, let our [marketing team](#) know and we can add it to the template so that everyone benefits.

What is FINOS?

Fintech
Open Source
Foundation

The Fintech Open Source Foundation (FINOS) is an **independent, non-profit membership organization** whose purpose is to **accelerate** collaboration and **innovation in financial services** through the adoption of Open Source software, standards and best practices.

FINOS is also the financial services project of the Linux Foundation, the largest shared technology investment in the world.

Oh, and in case you're wondering, it's pronounced **fee-nowz**

What do we do, at a glance?

The Fintech Open Source Foundation (FINOS) acts as an **independent, neutral, compliant steward** for transparently governed open source, open standards and specifications **relied & collaborated upon by the financial industry at large.**

Supported by over **80 member organizations**, we nurtured **2000+ contributors from financial institutions, big tech and fintech vendors** to mutualize resolution of **common, non-differentiating strategic challenges** in **50+ open projects**.

FINOS also runs an **Open Source Readiness Initiative** to help financial firms harvest **the full business value of open source participation, in full regulatory compliance**

FINOS hosts the **Open Source in Finance Forum**, the only **Open Source conference solely focused on financial services and regulated industries.**

FINOS Project Sandbox

Benefits

For adopters: it shows the art of the possible of FINOS projects.

For project maintainers and contributors: it lowers barriers to participation and helps projects scale, providing a venue for consumers and contributors to engage.

What is the FINOS Project Sandbox?

The **FINOS Sandbox** allows FINOS open source projects to host a public runtime environment to serve different purposes, like enabling easy evaluation, public collaboration or delivering real life demo environments. The FINOS technology team provides infrastructure and operational support to project maintainers, enabling them to focus on development rather than operations.

Propose a Project for Inclusion

All contributors to **FINOS projects** that are affiliated with a **FINOS Member** can request to be included in the FINOS Project Sandbox by emailing help@finos.org.

2024 FINOS Strategic Initiatives

Each year the FINOS Governing Board and its Members identify strategic priorities across our 50+ projects: the FINOS Strategic initiatives receive focused attention from the FINOS team and dedicated funding.

The newly formed **AI Readiness SIG** will provide a space to discuss challenges that are common to all members. Get involved in the formation today.

[AI Readiness Github](#)

The **FINOS Common Cloud Controls (FINOS CCC)** is a pioneering initiative aimed at standardizing cloud deployments within the financial services sector.

[CCC Homepage](#)

The **Common Domain Model (CDM)** is a standardized, machine-readable, and machine-executable model representing financial products, trades, and their lifecycle events.
